

# Homework 1

---

## Description:

Please design a program that can copy a file. You should use **argument list** to read the input file. We will put the two test data at `/home/data/hw1`. You can verify your program by these files.

Submission detail is on course website.

## Command line:

```
$ ./hw1 (input file name) (output file name)
```

## Score:

read/write file	25%	
argument list	25%	
result correction	30%	(each data 10%)
report	20%	

## Deadline:

2015/10/13 15:00

Please submit you report before class.

**Copy homework is treated as negative points!!!**
